CSE0001 – Digital Literacy

Project Assignment Brief

Field	Details
Course Code	CSE0001
Course Title	Digital Literacy
Credits	1 Credit	Pass / Fail (Non-CGPA)
Target Students	First Year B.Tech – All Branches
Deliverable	GitHub Repository + README + Project Report (.docx / .pdf)
Submission Mode	Share GitHub repo link via VITyarthi portal
Total Marks	100 marks (internal project assessment)

The Scenario

You have just been selected as a Student Digital Ambassador at your college. Your role is to help your peers navigate the digital world — from creating professional online profiles, to communicating safely and responsibly online. Your first assignment is to build a Digital Literacy Portfolio that you will present to the faculty committee and share with your batch.

To complete this assignment, you will work through five tasks — one for each module of this course. All your work will be organized in a single GitHub repository, which is itself part of the deliverable. At the end, you will submit a written project report documenting your work, observations, and reflections.

No prior coding knowledge is required. Every tool you need is free and browser-based.

What You Must Submit

Your final submission must be a single GitHub repository containing the following structure:

File / Folder	What it should contain
`README.md`	Project overview, your name/reg no., module summaries, links
